

**Grupo RB**  
Leader in Natural Resins

## INTEGRATED GLOBAL POLICY

The Grupo RB is committed to achieve the excellence in Safety, Quality, Environment, Social Responsibility, Health & Sustainability assuring high standards and reinforcing our commitment in:

- **Attending** the expectations of the interested parties through actions directed to achieve the continuous improvement of the integrated management system.
- **Supplying** safe and quality products, complying with internal standards, legal and regulatory requirements and expectations of our customers.

The concept of Quality need to be understood in a wider sense, integrating the Food Safety concept too for the units that produce products for the Food Industry.

- **Assuring** the conformity with the legal requirements and other requirements that apply to the business, considering the life cycle of the products, from the harvest in the pine forests to the final processing.
- **Preventing** the environmental impact through an efficient and sustainable use of the natural resources, monitoring the climate change, controlling the significant environmental aspects and promoting a sustainable growth.
- **Using** natural resources in a conscious way, preventing the pollution, reducing the solid and liquid residues, greenhouse gases emissions and minimizing the waste of products.
- **Maintaining** a safe and healthy environment for our collaborators, customers, suppliers and all parties involved in our activities.
- **Qualify** and involve to our collaborators in the management and development of the integrated management system, promoting sustainable attitudes.
- **Promoting** the innovation and competitiveness, developing programs for technological, environmental and quality improvement of our products.
- **Establishing** periodical and participative communications to promote the Safety, Quality, Environmental and Health culture along all the organization.
- **Identifying** and managing the risks to prevent threats and take advantage of the opportunities, promoting the use of safe and effective processes in Safety, Quality, Health and Social and Environmental practices.

We expect that our collaborators and interested parties feel fully identified with these commitments based in the Grupo RB principles.
